

SNUBH, AhnLab to work on digital healthcare

17 April 2018 | News

The two companies plan to research various fields such as the digital healthcare and medical Internet of Things (IoT).

Seoul National University Bundang Hospital (SNUBH) and AhnLab have signed a Memorandum of Understanding (MoU) to conduct research on digital healthcare.

The two companies plan to research various fields such as the digital healthcare and medical Internet of Things (IoT) while also performing all-around cooperative research including investment, technology development, contents supply and service development.

The MoU will focus on seven key areas such as the development and implementation of a blockchain-based digital healthcare system, protecting personal information in regards to personal health information, researching medical IoT device security, cooperating on user healthcare services and strengthening their partnership, marketing and existing platforms.
