

Aenco Joins Enterprise Ethereum Alliance to boost healthtech industry

18 July 2018 | News

The synergy between these two companies is expected to further expand the benefits of the revolutionary Blockchain technology to the healthtech industry of Aenco is at the forefront.

Aenco, Blockchain-based healthtech digital financing solutions provider has officially join Enterprise Ethereum Alliance (EEA). The membership of the renowned Ethereum standards platform which has top Fortune-500 companies on board is expected to provide a vital boost to Aenco's current partnership network and further growth of its ecosystem.

By becoming a member of the EEA, Aenco has taken a big step towards providing a stronger capacity drive across its value chain, particularly in delivering the promises of key services in supporting a robust healthtech ecosystem. Aenco will focus on the following products:

- AENCO IB Solutions (comprising of Aenco's smart wallet AEN CONNECT, digital exchange for HealthTech Participants AENX, Healthtech sponsorship platform, and ongoing research and data analysis for contributors and participants);
- AENCO Prime Solutions (Decentralized Prime Brokerage Platform);
- AENCO Smartcap Solutions (Technology-driven Finance Platform for HealthTech Industry and Alternative Financing); and
- End-to-end blockchain application development for sponsored healthtech projects to facilitate research collaboration, drug development, clinical data and services exchange, for example.

The synergy between these two companies is expected to further expand the benefits of the revolutionary Blockchain technology to the healthtech industry of Aenco is at the forefront.

Getting on the EEA platform also helps Aenco capitalize on the leverage of an atmosphere of regulated entities to supply Blockchain-based financial solutions that effectively tackle challenges facing the industry.

These challenges include lack of a robust financial ecosystem for healthtech innovations, high entry barriers and burdensome hurdles in fundraising, little or no options for start-ups requiring end-to-end digital capital solutions and lack of a credible, global-accredited standard for token sale best practices across relevant jurisdictions.

Aenco's membership of EEA sets the stage for them to fully transform the healthcare technology sector through Blockchain's disruptive power. They can now focus on creating the enabling environment that will drive deep impact solutions, such as treatment and prevention of diseases as well as democratize entrepreneurialism in the sector through their Aenco community ecosystem.
