IntelyseYou partners With Aspen for Medical Response

September 11, 2018 | News

The new partnership with Aspen Medical International will offer a 24/7 emergency medical response, particularly in the Middle East, Africa and Eurasia.

Intelyse, a Sicuro Group company recently announced that they have entered into a strategic partnership with Aspen Medical International to deliver a full travel risk management solution as an integral part of their IntelyseYou product.

IntelyseYou is a highly flexible product that integrates and simplifies sophisticated communication tools, global incident feeds, tracking solutions and security and medical response for the duty of care and accountability for employers and employees, globally.

The IntelyseYou solution includes an intuitive smartphone application that enables location-based incident alerts, two-way messaging, an SOS panic and auto-call to Sicuro's 24hr/365 Global Operations Center. Health & Safety, Security or Operations Managers back in a corporate HQ can actively measure individual risk against organisational boundaries and monitor the activity and movements from the IntelyseYou platform or on its management app, whilst preserving the privacy of the user.

Those involved in the management of the organisation's risk can minimise the impact of identified threats by locating and mass-messaging their employees in near real-time in case of a crisis or a catastrophic incident.

The new partnership with Aspen Medical International will offer a 24/7 emergency medical response and bolster IntelyseYou's evacuation coverage for clients operating in many high-risk environments particularly in the Middle East, Africa and Eurasia. This complements IntelyseYou's security response, which is also supported, globally.

Dr. Andrew Walker, Aspen's Executive Chairman says "we are excited about this new partnership, it adds to our existing portfolio of delivering multi award-winning medical solutions to a range of sectors, globally."
