

Suven secures product patents in Australia, Hong Kong

14 November 2018 | News

The granted claims of the patents include the class of selective M1 PAM and 5-HT4 compounds respectively and are being developed as therapeutic agents for neurodegenerative disorders.

Suven Life Sciences Ltd (Suven) recently announced that the grant of one product patent from Australia (2016276139) and one product patent from Hong Kong (HK1217483) corresponding to the New Chemical Entities for the treatment of disorders associated with Neurodegenerative diseases and patents are valid through 2036 and 2033 respectively.

The granted claims of the patents include the class of selective M1 PAM and 5-HT4 compounds respectively and are being developed as therapeutic agents for neurodegenerative disorders such as for the treatment of cognitive impairment associated with neurodegenerative disorders like Alzheimer's disease, Attention deficient hyperactivity disorder (ADHD), Huntington's disease, Parkinson and Schizophrenia etc.

"We are very pleased by the grant of these patents to Suven for our pipeline of molecules in CNS arena that are being developed for cognitive disorders with high unmet medical need with huge market potential globally" says Venkat Jasti, CEO of Suven.
