

## FDA approves Sanofi & MSD's VAXELIS™

03 January 2019 | News

**VAXELIS is a vaccine indicated for active immunization to prevent diphtheria, tetanus, pertussis, poliomyelitis, hepatitis B, and invasive disease due to Haemophilus influenzae type b.**

The U.S. Food and Drug Administration has approved VAXELIS™ (Diphtheria and Tetanus Toxoids and Acellular Pertussis Adsorbed, Inactivated Poliovirus, Haemophilus b Conjugate [Meningococcal Protein Conjugate] and Hepatitis B [Recombinant] Vaccine for use in children from 6 weeks through 4 years of age.

VAXELIS was developed as part of a joint partnership between Sanofi and MSD (known as Merck inside the United States and Canada).

Sanofi and MSD are working to maximize production of VAXELIS to allow for a sustainable supply to meet anticipated U.S. demand. Commercial supply will not be available in the U.S. prior to 2020.

VAXELIS is a vaccine indicated for active immunization to prevent diphtheria, tetanus, pertussis, poliomyelitis, hepatitis B, and invasive disease due to Haemophilus influenzae type b.
