

IQVIA introduces regulatory information management system

12 February 2019 | News

More than regulatory information management (RIM), IQVIA RIM Smart delivers intelligent, interconnected global management across the complete portfolio and regulatory lifecycle.

IQVIA has announced the launch of IQVIA RIM Smart, the first fully integrated, cloud-based, end-to-end regulatory information management solution for life sciences.

Designed to leverage artificial intelligence (AI) and machine learning (ML), IQVIA Technologies' new solution enables intelligent management of a product portfolio's complete regulatory lifecycle.

RIM Smart automates high-volume tasks, efficiently boosting accuracy, improving data quality, and reducing costs. This unique solution incorporates up-to-date regulatory intelligence information through the software, providing specific and detailed country-level regulatory requirements. Using an array of fully integrated modules that can be customized to meet specific customer needs, RIM Smart is appropriate for companies of all sizes.

More than a regulatory information management system, RIM Smart will provide content management, registration tracking, monitoring of health authority interactions and commitments, submission planning, publishing, and soon, product labeling and translation capabilities. It easily handles routine workflows, enabling clients to use their resources to focus on bringing safe and effective products to market and ultimately driving healthcare forward.
