

AlzProtect partners with PAREXEL Biotech for PSP

22 March 2019 | News

The partnership will perform the clinical phase 2a development of AZP2006 for the treatment of Progressive Supranuclear Palsy (PSP)

ALZPROTECT, a biopharmaceutical company engaged in the development of drugs for the treatment of Alzheimer's disease, announced that PAREXEL Biotech, a new division of PAREXEL International Corporation, has been selected to perform the clinical phase 2a development of AZP2006 for the treatment of Progressive Supranuclear Palsy (PSP), a rare degenerative disease of the brain.

PAREXEL Biotech will fulfill AlzProtect's needs related to the completion of their Phase 2a clinical study from protocol writing to the coordination of patient recruitment.

"PAREXEL'S recently launched Biotech unit delivers innovative, customized offerings to the biotech community, building on our more than 20 years of experience in this area," said Jim Anthony, Global Head of Biotech, PAREXEL. "Our collaboration with AlzProtect is a great example of how we can work together in a unique way, and we look forward to helping advance this important rare disease initiative."
