

NeoGenomics opens pharma services laboratory in Singapore

06 August 2019 | News

Lab is located in same building as PPD® Laboratories' Central Lab and will support Asia-Pacific oncology trials

NeoGenomics, Inc., a leading provider of cancer-focused genetics testing services, and Pharmaceutical Product Development, LLC (PPD), a leading global contract research organization (CRO), announced the grand opening of a NeoGenomics oncology-focused clinical trials testing lab in the same building as the PPD® Laboratories central lab in Singapore.

NeoGenomics and PPD formed an alliance in 2018 to provide premier laboratory testing solutions for oncology clinical trials and biomarker research and development. Through the collaboration, NeoGenomics provides a wide range of lab testing services to support PPD Laboratories' oncology clinical trial activities in North America, Europe and Asia-Pacific.

This expansion in Singapore is part of the companies' established plan to invest in PPD's existing labs service offerings in China and Singapore. It also augments PPD Laboratories' offerings of specialized oncology and pathology biomarker testing for biopharmaceutical customers and advances the companies' initiative to provide an integrated, global solution for complex development programs.
