Avidity Science acquires Edstrom Japan Ltd

October 17, 2019 | News

"By acquiring Edstrom Japan, we will expand our customer engagement in Asia, supporting our objective of becoming a more valuable research tools partner in key markets."

Avidity Science is pleased to announce it has completed its acquisition of Edstrom Japan Ltd. The acquisition furthers Avidity Science's efforts to build its global footprint supporting the research tools market.

Based in Tokyo, Japan, Edstrom Japan has provided a broad range of product and service solutions into the Japanese vivarium research market for over 30 years. In addition to supporting the Avidity Science water purification portfolio, Edstrom Japan provides a wide range of equipment, consumables, and services used in biomedical research.

"By acquiring Edstrom Japan, we will expand our customer engagement in Asia, supporting our objective of becoming a more valuable research tools partner in key markets," said Doug Lohse, Chief Executive Officer, Avidity Science. "This is another step forward in our mission of enabling science to improve the quality of life."

"We are excited about how the capabilities of Edstrom Japan will enable our company to provide both high-quality products and services in Japan," said Yasuto Tamukai, Managing Director – Greater Asia, Avidity Science.
