Philips unveils new solutions in precision category

January 27, 2020 | News

Showcases AI-Powered Solutions For Precision Diagnosis at IRIA 2020

Royal Philips, a global leader in health technology, has highlighted its industry-leading AI driven enterprise imaging portfolio including innovative digital imaging platforms, advanced informatics and a suite of services at the 73rd Annual Conference of the Indian Radiological and Imaging Association (IRIA 2020), held in Gujarat, India recently.

The company also introduced its advanced solutions such as Lumify (app-based high-quality portable ultrasound), MR – OR and RT oncology, wAssist (an innovative AI based solution that assists compliance to PNDT act and seamlessly integrates with medical practitioners standard workflow), Vereos Digital PET/CT (world's first and only fully digital, clinically proven, PET/CT solution), Incisive Computed Tomography (CT) (platform designed to integrate innovations in imaging, workflow and lifecycle management) amongst others.

Daniel Mazon, Vice Chairman and Managing Director at Philips Indian Subcontinent commented,"We are glad to exhibit our advanced AI-powered imaging solutions at IRIA 2020. Our new solutions will allow patients and healthcare professionals to fully harness the power of information and translate it into actionable insights, providing a pathway for seamless integrated precision diagnosis platform resulting in better outcomes for patients and care-givers."
