

## Bactiguard makes first acquisition with Vigilenz

05 February 2020 | News

### The acquisition strengthens Bactiguard's position in infection control and wound management

Swedish medical device company Bactiguard deepens the partnership that was initiated in 2015 by acquiring Vigilenz Medical Devices and Vigilenz Medical Supplies (together Vigilenz) in Malaysia.

The acquisition strengthens Bactiguard's position in infection control and wound management, as well as innovation and product development capability and capacity.

The consideration consists of a cash payment of USD 4.5 million payable at closing and, subject to approval by the annual general meeting of shareholders (AGM), 241 512 new class B-shares in Bactiguard, equivalent to a value of USD 2 million.

Bactiguard Holding AB (publ) (Bactiguard) has entered an agreement to acquire Vigilenz, a Malaysian manufacturer and supplier of medical devices and consumables, primarily active in wound management and infection control. Bactiguard and Vigilenz have been partners since 2015, when an agreement to develop Bactiguard-coated orthopaedic trauma implants was signed. The implants were CE-marked in late 2018, which paved the way for Bactiguard's global license agreement with Zimmer Biomet.

Vigilenz has a portfolio of products ranging from surgical sutures, mesh, wound wash and dressings, to orthopaedic trauma implants. One product which Bactiguard considers has significant potential is HYDROCYN aqua®, for advanced wound management of acute and chronic wounds. The product is CE-marked and has been registered by the US FDA. Vigilenz's research and development activities focus on biomaterials for medical application, urology, cardiovascular and wound management products, with the aim of reducing device related infections. It also has a strong regional distribution network in South East Asia.
