

Singapore's NGL expands affordable medical healthcare

30 March 2020 | News

Novena Global Surgery under DORR AI has established a new partnership with AIA Singapore in being a preferred Day Surgery Facility partner, aiming to champion a shift for all Singaporeans to provide premier affordable healthcare medical services via its day surgery centres

Novena Global Lifecare (the "Company" or "NGL"), entrenches its footprint in Singapore for its medical healthcare division under its group of companies, **Novena Global Surgery**. As one of Asia's largest integrated medical healthcare and aesthetics group, Novena Global Lifecare has established itself as leader in Taiwan's health screening sector.

The official signing ceremony was held on 27 March 2020 and was presided by Novena Global Lifecare Co-Founders, Mr Nelson Loh (Executive Chairman) & Mr Terence Loh (CEO); Dr Lim Cheok Peng, Senior Medical Advisor of Novena Global Healthcare group; and Ms Melita Teo, Chief Operations Officer of AIA Singapore whom officiated the partnership.

Currently, Novena Global Lifecare drives a multi-million revenue portfolio that provides lifecare management solutions tailored to Asian demographics to help customers in their journey of well-being across their life stages. The establishment of Novena Global Surgery includes Aptus Surgery Centre ("Aptus") in Paragon Medical Centre and Novaptus Surgery Centre ("Novaptus") at Camden Medical Centre. Both offer health screenings and day surgery facilities to their customers.

Terence Loh, co-founder of NGL, said: "Our move to drive our focus in expanding our Medical Healthcare services division back in Singapore is timely. Despite such a challenging time for businesses, we still believe the focus on healthcare is now ever important. Singapore ranks high in medical inflation prospects in the region. NGL's ethos of providing value to its clients coupled with our expertise especially in Taiwan, will allow us to champion shifts in driving affordable primary healthcare services for all. Day surgery centres are known to be more cost-effective as it helps patients save up to 20 -30% in medical fees and time efficacy in today's escalating healthcare costs."

Each of its facilities have four state-of-the-art operating theatres with cableless pendant systems and are equipped for a range of surgeries, including plastic, dental and eye procedures rivalling. Patients are also able to have hand, laparoscopic surgery and endoscopic diagnostic procedures carried out.
