

Icon Group, Varian to advance cancer care

03 April 2020 | News

Icon Group have been long-term global partners of Varian

The Icon Cancer Centre Wairoonga in Australia has treated its first cancer patient with Varian Ethos™. This artificial intelligence (AI)-driven holistic adaptive therapy solution is designed to deliver an entire adapted treatment in a typical 15-minute timeslot.

Icon Cancer Centre is part of Icon Group, Australia's largest dedicated cancer care provider with a growing reach into Asia. Icon Group have been long-term global partners of Varian and have continued to support Varian in the evolution of radiation therapy technology.

Kenneth Tan, president, Varian Asia Pacific said: "We are proud of our long-standing strategic partnership with Icon. As consistent early adopters of technology, they are at the forefront of bringing the latest treatment options to cancer patients in the Southern Hemisphere. Radiation therapy has evolved immensely over the past decade. By harnessing the power of AI and working with partners such as Icon, we are taking another step forward in achieving our vision of living in a world without fear of cancer."
