

MIMS conducts COVID-19 conversation web-series for Asian PCPs

28 May 2020 | News

The online symposium was aimed to translate the fast-evolving science of COVID-19 patient care into practical clinical pearls for the Asian PCP and to provide insights on future outbreak preparedness

Singapore based MIMS Group conducted an online symposium for Asian primary care physicians (PCPs) titled "COVID-19: What it means to your clinic" recently.

The inaugural webcast of MIMS's COVID Conversations Series, the event saw general practitioners and family doctors log-in from 26 countries, with doctors from the Philippines, Malaysia, Singapore, Hong Kong, and Indonesia comprising the majority of participants.

The webcast featured Professor Ivan Hung, Clinical Professor and Chief of Infectious Diseases, Department of Medicine, Li Ka Shing Faculty of Medicine, University of Hong Kong, as keynote presenter; and Dr. Helmy Haja Mydin, head of The Lung Centre, Pantai Hospital Kuala Lumpur, Malaysia, as discussant. MIMS's Dr. Awi Curameng served as the webcast moderator.

The online symposium was aimed at translating the fast-evolving science of COVID-19 patient care into practical clinical pearls for the Asian PCP and providing insights on how clinicians can prepare for the next outbreak. Topics discussed included novel coronavirus transmission, clinical presentations, high-risk populations, COVID-19 diagnosis, general management principles, specific treatments, recommended infection control practices, and the outlook on vaccines.

The MIMS COVID Conversations Series is part of MIMS's focused effort to provide essential COVID-19 content to the healthcare professional community across the Asia Pacific.
