Taiwan launches website for COVID-19 prevention strategies

June 15, 2020 | News

The website elaborates on Taiwan's resilient pandemic preparedness strategies, efficient Healthcare system and many more models implemented to combat COVID-19

Taiwan Ministry of Health and Welfare launched a dedicated COVID-19 website detailing the prevention strategies implemented by Tawan to combat the deadly pandemic.

Ministry aims to share the strategies employed and formulated by the central and local governments to fight COVID-19 within local and international communities.

https://covid19.mohw.gov.tw/en/mp-206.html

- The website contains a wide range of contexts including;
- The Taiwan Model (The timeline on how COVID-19 has been managed in Taiwan)
- Key success factors in combating COVID-19
- Healthcare system in handling COVID-19
- Major policies announced in managing COVID-19 related issues.

The website shares epidemic prevention experiences on https://www.anti-covid-19.tw/

Also motivates other countries to take guidelines and to clarify their queries from Taiwan's experts regarding tackling the virus and the pandemic situation. https://fightcovid.edu.tw/
