Joimax develops partnership with Japan Medicalnext

June 22, 2020 | News

That will result in an extensive distribution agreement for the entire Japanese market

Joimax, the German based market leader in technologies and training methods for full-endoscopic and minimally invasive spinal surgery, is starting, as of now, a new partnership in Japan. The distributor Japan Medicalnext and Joimax are pursuing a long-term sales cooperation that will result in an extensive distribution agreement for the entire Japanese market.

In procedures for herniated disc, stenosis, pain therapy or spinal stabilization treatment, surgeons utilize Joimax technologies to operate through small incisions under local or full anesthesia, via tissue and muscle-sparing corridors and through natural openings in the spinal canal.

Japan Medicalnext has an orthopedics division that will focus on Joimax products. The company is a wholly owned entity of MC Healthcare, Inc., subsidiary of Mitsubishi Corporation, and prominent supplier of medical devices in Japan.
