

WHO introduces new COVID-19 law lab

29 July 2020 | News

The COVID-19 Law Lab is a database of laws that countries have implemented in response to the pandemic

The COVID-19 Law Lab initiative gathers and shares legal documents from over 190 countries across the world to help states establish and implement strong legal frameworks to manage the pandemic.

The goal is to ensure that laws protect the health and wellbeing of individuals and communities and that they adhere to international human rights standards.

The new Lab (at www.COVIDLawLab.org) is a joint project of United Nations Development Programme (UNDP), the World Health Organization (WHO), the Joint United Nations Programme on HIV/AIDS (UNAIDS) and the O'Neill Institute for National and Global Health Law at Georgetown University.

Well-designed laws can help build strong health systems; evaluate and approve safe and effective drugs and vaccines; and enforce actions to create healthier and safer public spaces and workplaces.

Critically, they are key to effective implementation of the WHO International Health Regulations: surveillance; infection prevention and control; management of travel and trade; and implementation of measures to maintain essential health services.

The COVID-19 Law Lab is a database of laws that countries have implemented in response to the pandemic. It includes state of emergency declarations, quarantine measures, disease surveillance, legal measures relating to mask-wearing, social distancing, and access to medication and vaccines. The database will continue to grow as more countries and themes are added.
