# Evado is pleased to announce the launch of Evado OnDemand.

October 26, 2020 | News

**Evado OnDemand has been designed to be instantly accessable for the rapid delivery of clinical trials.**

The COVID Pandemic has dramatically disrupted the delivery of clinical trials. Sponsors now require instant access to clinical software so that trials can be set up without any delays. Evado's Clinical enterprise clinical trial software has been re-imaged as Evado OnDemand to meet this need.

Competitively priced for trials of all sizes, Evado OnDemand provides sponsors with a fast turnaround from setup to recruitment, with all of the features of an enterprise solution delivered as a simple on demand service.

Evado OnDemand has three tiers of service, purchased on a per trial basis.

- **Lite**: is a simple easy to user service for small trials with up to 200 subjects:
- **Standard**: is a service for medium sized trials or registries with up to 500 subjects. • **Enhanced**: is a service for large sized trials or registries with greater than 500 subjects.

Evado OnDemand ( https://www.evado.com/ondemand/ ) also caters for larger sponsors by providing an enterprise service for multiple trials or registries.
