Wireless wetness care system

Company: Golden Com International Enterprise

Dimension: 19x13x4 cm

Weight: 0.3kg

CAREase wireless wetness inductive system and diaper is a whole new innovation in the world. It uses wireless RF technology, so that users don't need to deliver the wetness message to the nursing. The nursing can catch the users' wetness message through the display panel and take action. It doesn't disturb users and protects skin from infection. It also keeps the users' dignity, while also decreasing the load on nursing.
