# Korea introduces world's first smart healthcare device

January 12, 2021 | News

**2-in-One Smart Healthcare Device, Fully integrated with an Alexa Built-in Smart Display Speaker & Detachable Health Tracker helps identify physiological abnormalities**

Korean startup ICON.AI unveiled the World 1st Smart Healthcare Device during CES 2021, the most influential tech event in the world taking place from 11 to 14 January 2021.

With just One Touch of the Detachable Health Tracker, the Smart Healthcare Device takes comprehensive readings from your fingertips to track heart rate information, blood pressure trends, peripheral oxygen saturation levels and more, all in nearly 60 seconds.

The Smart Healthcare Device is composed of two main parts: a Smart Display Speaker with Alexa Built-in & a Detachable Health Tracker. The Smart Display Speaker includes: a LCD Touchscreen, 5W Speaker with High Bass and Surround, Bluetooth & WiFi.

Fully equipped with a Smart Display Speaker with Alexa Built-in & a Detachable Health Tracker, the Smart Healthcare Device defines itself as a game-changing smart healthcare device. Just putting two fingers on the Health Tracker allows you to track the six critical health readings: Heart rate trends, Heart Rate variability, blood pressure trends, SpO2, ECG, and PPG, all in nearly 60 seconds. Its lightweight portability allows you to send a detailed health report directly to your smartphone and tablets anytime and anywhere.
