Thermo Scientific Introduced New Orbitrap Exploris GCMS

March 8, 2021 | News

Expanding analytical power with simplicity Simplify operations and deliver consistently accurate results in analytical testing with the Thermo Scientific Orbitrap Exploris GC Mass Spectrometer. Transform everyday quantitation, screening and sample profiling through a unique depth in analysis, with the highest accuracy and precision. Gain the flexibility to keep pace with ever-changing regulations and explore new opportunities through increased scope and method consolidation. Simple instrument set up and intelligent informatics enable users of all ability to easily access data-rich information.

Explore new opportunities to transform efficiency in analytical testing. From high throughput quantitative analysis to compound screening, the Thermo Scientific™ Orbitrap Exploris™ GC mass spectrometer delivers the performance and robustness required to simplify operations, keep pace with changing regulations and expand laboratory capability.

Spend less time evaluating data and increase confidence with exceptional levels of selectivity, sensitivity and linear dynamic range that come together to deliver accurate results across all applications and sample types.

Key benefits:
- Simplify analytical testing and open up new opportunities.
- Focus on delivering accurate results with fast method setup and data review.
- Have the flexibility to quickly increase scope of analysis with intuitive instrument control.
