

SCIEX appoints Joe Fox as President

02 April 2021 | News

Fox joined SCIEX in 2011 and has demonstrated exceptional leadership and DBS management in each of his roles

SCIEX, a global leader in life science analytical technologies, has announced Joe Fox as President, effective April 1, 2021. Fox assumes the role from Inese Lowenstein, who led SCIEX for four years.

Lowenstein has been appointed Senior Talent Advisor at Danaher, responsible for new President coaching, [DBS](#) immersion tool development and advising on a variety of diversity and inclusion initiatives.

Fox and the SCIEX leadership team will build on the strong momentum the company has achieved over the past four years. He will focus on extending the company's leadership in quantitative LC-MS, and oversee the launch of innovative technologies later this year.

"Thanks to Inese and the entire team we are in a privileged position throughout the organization. Our passion for customers will continue, as will our commitment to deepening and diversifying our portfolio to better serve their needs," said Mr. Fox. "The Power of Precision is both our mission and promise to customers. We will continue to advance analytical life science capabilities, and deepen and diversify our portfolio to empower them."

Fox joined SCIEX in 2011 and has demonstrated exceptional leadership and DBS management in each of his roles. Most recently, as Senior Vice President, Global Sales and Service, Fox led and inspired a global commercial workforce across the Americas, EMEA and JAPAC. His passion for employee engagement and empowerment will continue as President of SCIEX.
