Acquiring the STARLIMS informatics product suite and related business assets

Francisco Partners, a US-based global investment firm that specializes in partnering with technology businesses, has announced that it has signed a definitive agreement to acquire the STARLIMS informatics product suite and related business assets from Abbott.

A world-class Laboratory Information Management System (LIMS) solution, STARLIMS is a product suite that improves both quality and safety for organizations throughout the entire product lifecycle, beginning with R&D.

For more than 35 years, STARLIMS software solutions have helped organizations to manage the collection, processing, storage, retrieval and analysis of information generated in laboratories.

Since 1986, the STARLIMS business has accelerated worldwide sales growth to now serve more than 1,100 customers across 60 countries spanning the Americas, Europe, Africa, and Asia.

Today, STARLIMS solutions are used by top companies in the life sciences, pharma & biotech, chemical & refining, food & beverage, manufacturing, environmental, public health and forensics sectors.

"The STARLIMS technology is a leader in data and workflow management for laboratories across the globe. With the constantly changing landscape of quality manufacturing coupled with substantial industry tailwinds, we believe the business is well positioned for continued growth as it supports its customers through the entire product lifecycle from R&D and trials through manufacturing and compliance," said Ezra Perlman, Co-President of Francisco Partners. "We are excited to support STARLIMS in its next phase of growth, and we look forward to helping the business further evolve its innovative product suite to meet the needs of its customers while maintaining its industry-leading safety and compliance standards."
