Tiyanyin Pharma recieves GMP certification

July 8, 2014 | News | By BioSpectrum Bureau

Singapore: China-based Tianyin Pharmaceutical has received good manufacturing practice (GMP) certification under certificate number Chuan K0592, valid until December 31, 2015 for its tablets manufacturing division.

In April 2014, TPI announced that the regulatory quality and pricing tests were conducted by the China Food and Drug Administration (CFDA) of Sichuan province, which resulted in the company's GMP certificate being temporarily administrated by the provincial CFDA. As a result, production and sale of certain of the Company's products were temporarily halted, pending the results of quality and pricing tests.
