

STGT invests 11 B Baht to expand production of gloves in Thailand owing to COVID-19

29 July 2021 | News

To expand the production capacity to approx 100 billion pieces per year by 2026

Sri Trang Gloves (Thailand) Public Company Limited (STGT) continues to expand production of rubber gloves. The goal is to open 4 factories within this year, with a total investment of more than 11 billion baht.

The goal is to expand the production capacity to approximately 100 billion pieces per year by 2026 to create growth and increase its share in the global rubber gloves market.

Due to the new wave of COVID-19 epidemic situation in many countries and the mutation of the virus, the company has decided to expand the production capacity of rubber gloves.

"Currently, we are ready to expand our production capacity continuously. Although in the past there have been some obstacles arising from the fire at the factory and the detection of employees infected with COVID-19, however, the problem has been solved and vaccination is given to all employees. And we are accelerating the construction and installation of machinery to open two more factories in Sadao district, Songkhla province and Trang province in the second half of this year as planned," said Jarinya Jirotkul, President, STGT.
