Reports to: QA Manager

Location: Liaocheng

The Purpose of Position:

- To assist to develop and maintain a quality management system to ensure ANH premix products compliance with relevant standards and regulations, in order to satisfy customer requirements, meet all legal and regulatory demands and continuously improve products and operations.

The Position:

- Responsible for QC daily analysis on local site to provide timely and accurate analytical information to support and improve production. To ensure analysis result input in SAP system timely and correctly.
- Act as user for SAP QM of ANH products, responsible for daily operation of SAP QM for local premix products.
- Assist for renewal of licenses & permits, responsible for premix product approval application, product registration, and support any other requirements from authorities related to ANH premix products.
- Act as backup of handling of every production deviation and release every lot of finished goods in PCS system.
- Responsible for effective running of local DCC (documentation control central), and arrange training to local plant.
- Responsible for checking of label content for production.
- Assist for handling of quality customer complaints for local ANH premix products.
- Assist for handling of returned goods and nonconforming products to determine whether materials and finished goods can be used/released or not.

- Implement an annual QA plan for ANH premix, and act as routine quality inspection for local ANH premix plant.
- Assist for quality data filing including NCR/EMR/RGR/CAR etc., and follow up of CAR completion.
- Assist for implementation of local compliance audits (supplier, authority).
- Assist for arrangement of validation of key process/equipment/facilities.
- Maintenance of premix plant accreditation licenses such as ISO22000 and HACCP.
- Responsible for safety of QC lab, include personal safety, health, environment and safety machine running normally.
- Obey company SHE, OH and ER procedures strictly. Report incidents/accident/near misses timely. Create and maintain a safe and healthy working environment to ensure compliance with safety requirements within the Quality Assurance part.

The Ideal:

- Bachelor level in Sciences (majored in chemicals or pharmaceuticals)
- Prior to experience in Quality Management

The Reward:

We offer you a rewarding and challenging job with lots of opportunities for personal growth and career development in a professional, entrepreneurial, no-nonsense and very agile environment. We strive to be an Employer of Choice and ensure that our employees are nurtured and given the opportunity to develop their talents. Terms and conditions as well as fringe benefits and salary are in line with market standards.
