Singapore's iGene Laboratory donates 25,000 SARS-CoV-2 PCR Kits to Indonesia

September 15, 2021 | News

Aims to strengthen the relationship between Indonesia and Singapore at various levels

Singapore's iGene Laboratory Pte. Ltd donates 25,000 SARS-CoV-2 PCR Kits to Indonesia to assist the government of the Republic of Indonesia in managing the COVID-19 disease outbreak. The occasion was marked with a symbolic hand-over ceremony at the Republic of Indonesia Embassy in Singapore on 13 September 2021 hosted by the Indonesian Ambassador, H.E. Suryo Pratomo.

The donated RT-PCR kits will be handed over for immediate deployment in the Gatot Soebroto Army Hospital and Dr. Esnawan Hospital Indonesia.

Mr. Kane Black, CEO of iGene Laboratory and parent company INEX Innovate, said - "In what are unprecedented challenging times in our lifetime, it is crucial that we come together and assist one another. We are pleased and grateful to be able to step up and play a small role in supporting Indonesia's continuing fight against the COVID-19 pandemic in times of need."
