Month	Content
January	2022: Vision & Mission Leveraging investment and expediting innovations in Asian healthcare ecosystem Identifying investors & stakeholder opportunities in emerging Asian Bio-pharma market Advancing medical devices from bench to bed side and regulatory challenges involved Should Bio-pharma companies cooperate for IP protection waiver for propriety medicines during a pandem Mental Health ventures and crowd funding in Asian countries
FEBRUARY	APAC seed funding structure and formulations Point of care (PoC) implementation in APAC and its market potential Risk evaluation and management of new drug application (NDA) for novel therapeutic products Opportunities, scope and challenges of healthcare biateral trade among APAC countries Are health monitoring apps and gadgets overrated? Designing appropriate business models at Asian healthcare startup eco system
March	Women in Asian Healthcare space (Special Edition) Genomic medicines in the diagnosis and treatment of NCDs Prospects and drives in APAC pharmaceutical e-commerce market Fine tuning AI devices algorithms for transparancy in medical regulation How successful is APAC in attracting western investment to biotechnology and biopharmaceutical sectors? Optimum design control and clinical evaluation around medical device life cycle
April	Precision drug manufacturing and therapeutic innovations in Asia-Pacific Incubators and Investor relations in APAC pharma / Bio industry Biomarker Testing for Cancer Treatment :: Regulating cancer progression through hormonal and immune t

	Navigating through APAC healthcare pricing and reimbursement landscape (Regulatory)
	Will 3D Printing play a reliable role in regenerative medicine?
	Global strategic alliances approach to strengthen Asia’s healthcare ecosystem
May	Potentials at Asia Pacific active pharmaceutical ingredients (API) market
	CAR-T therapy landscape in bolstering oncology R&D
	Role of Blockchain in streamlining healthcare and supplychain ecosystem
	Implantable medical devices and neurostimulator's market potentials and prospects in APAC
	Can drug repurposing be a solution to reduce the approval cycle of pharma products?
	Implementing Universal Health Coverage (UHC) in Asia’s healthcare landscape (shaping policies and strat
June	Advancements in Drug Delivery Systems (DDS) solutions in APAC
	Aesthetic biomaterial trade and commerce prospects in APAC (surgical bio-cosmetic industry)
	Preventing Adverse Drug Reactions (ADRs) through Pharmacovigilance
	APAC regulatory approval system: Challenges and Opportunities
	Will rapid approval of COVID-19 vaccines pave the path for quick drug approvals in the future?
	Opportunities, scope and challenges of healthcare bilateral trade among APAC countries
July	Potentials at Asia-Pacific CDMO portfolios and evaluating ideal partnership strategies
	Achieving agility at pharmaceutical R&D and manufacturing sphere
	Promising innovations and technologies to tackle emerging AMR concerns: The APAC response
	Enthralling CRISPR innovations in pioneering therpeutics
	Will healthcare venture capitalisation see a surge in a post-COVID era or will face a pre-pandemic curve?
	Overcoming the side effects of radiation therapy in cancer treatment
August	3D cell culture systems: Mimicking human organs and disease models for drug discovery
	Stem cell banking and potential stem cell treatments in paediatric diagnosis
	Role of next-Gen sequencers and analysers in cutting-edge genomic medicine research
	CMO services in biomanufacturing
	Can novel invitro cell-based approaches replace animal models in drug screenng & evaluation in future?
	Clinical advancements in Diabetes vaccines
September	Generic drug manufacturing and competitiveness in Asian market
	Novel trends and innovations in therapeutic medical device sphere
	APAC venture capitalism(VC), investment and funding opportunities in biopharma sector
	Autoimmune disease therapeutics and it's diagnostic market in Asia
	Is medical science having an ethical balance in the cloning/transgenic arena?
	Optimization of venture capitalism and seed-funding in APAC to accelerate RIO
October	Value addition around strategic sponsorship and market expansion at Asian CRO's
	Strategic valuation models to calculate value of Pharma and Biotech companies (Purchase and selling pric
	Novel anti-parasitic vaccine development and their market approach (malaria, TB, Dengue, yellow fever)
	Recent 3-D printing revolution in medical devices and diagnostic industry
	Will the growing list of childhood vaccinations interfere with innate immunity genes in future population?
	Implementing universal healthcare coverage
November	Boosting grants, M&A, capitalism and endowment in Asian healthcare sector
	Latest advancemnets in Pharma and healthcare technology: 2022 trends

	Implementation of platform technologies in drug discovery and vaccine manufacturing
	Internet of Medical Things (IoMT) forecasts for MedTech and HealthTech
	Is APAC successful in shaping Universal Health Coverage (UHC) policies
	Current trend and development in Bioinformatics and Computational Biology
December	Premier 2022 R&D and revolutionary therapeutic solutions from Asia-Pacific
	Role of Microfluidic chip and organ-on-a-chip (OOAC) technology in precision medicine
	Achieving commercial success in APAC pharmaceutical and medical device markets: A survey
	Investigating anti-competitive practices in biosimilar and generics market causing lag in market penetration
	Is telemedicine impactful and reliable with a distant patient examination model?
	Innovative funding models at pharma & biopharmaceutical R&D investments
