Webinar: COVID-19 Molecular Testing Ã¢â?¬â?? Supporting Back to Life & Work

December 28, 2021 | News

As the world returns to normalcy, how we keep the work and living environments safe from SARS-CoV-2 becomes an important consideration. In this webinar, we discuss the current situation in the region, and the steps to do exactly that.

On-demand webinar is available now

Duration: 60 minutes

Language: English

Platform: Virtual

Key Topics:

- Living with COVID in Taiwan
- COVID-19 Situation in Southeast Asia
- In-Air SARS-CoV-2 Surveillance
- Post-Vaccination COVID-Testing in the Workplace – Prepare for the New Normal

As the rate of COVID-19 infections begins to slow down, it seems that the world is slowly returning to normalcy. While we are mitigating the pandemic until there is a proven cure for the disease or adequate vaccinations significantly lower the prevalence of COVID-19, virus surveillance and molecular testing remains a priority to manage the pandemic. How to keep the workplace or daily environment safe from SARS-CoV-2 virus becomes a vital topic. Here, we will discuss this testing concept and the innovative solutions to support you back to a new normal.

Click here to join our Back-to-Life & Work Webinar journey where we're bringing together experienced experts across the region to share the importance of asymptomatic testing and surveillance.
