SenseTime Partners with Macau's Kiang Wu Hospital in China

SenseTime, a leading global artificial intelligence (AI) software company, has formed a strategic partnership with Kiang Wu Hospital, one of the largest and oldest hospitals in Macau, China to advance smart health application and research with AI.

The partnership builds upon deployments of multiple AI modules of SenseTime's SenseCare Smart Health Platform in the past year, aiming to further accelerate the adoption and research of AI technologies in healthcare and create a new paradigm of smart hospital.

SenseTime's proprietary SenseCare platform is a high-performance diagnostic and treatment assistance platform which provides various AI-powered tools for different clinical departments.

Following the phase-one deployment of the Cardiac Computed Tomography Angiography (CTA), Lung Computed Tomography (CT), Chest X-Ray modules in December 2020, Kiang Wu hospital has continued to expand the use of SenseCare platform with Liver CT, Carotid CTA, Radiation Therapy (RT) Contour, Liver Magnetic Resonance Imaging (MRI) and more, achieving nearly 100% utilization rate for many of them, which demonstrates the reliability of SenseCare and the strong confidence from doctors.
