Thailand accelerates use of 5G applications to introduce new technologies

December 20, 2021 | News

Including innovative application services for smart medical care

National Telecom (NT), The WhiteSpace (The WSP), Delta Electronics (Thailand) PCL and Chunghwa Telecom have signed a Memorandum of Understanding (MOU) for collaboration in a 5G private network.

The joint project will support the "Thailand 4.0" innovative manufacturing plan and assist Thailand in accelerating the use of 5G Innovative applications to introduce technologies such as the Internet of Things (IoT), information security, artificial intelligence (AI), and big data. In addition, the project will help realize innovative application services, such as Thailand's smart manufacturing, remote collaboration, and smart medical care.

In the future, this joint plan will extend to the local government, manufacturing, tourism, medical or financial industries in Thailand.

Moreover, it will assist the Thai government in creating a 5G innovative application service ecosystem to make Thailand a leader in "industrial transformation" and "technological innovation" among the five North ASEAN countries (Thailand, Cambodia, Myanmar, Laos, and Vietnam).
