10 February 2022 | News

22 - 24 February 2022 , 3-day virtual symposium

Agilent Partner Universities
Academic Drug Discovery
Virtual Symposium
22–24 February 2022

Imperial College London
NUS National University of Singapore
USC Michelson Center for Convergent Bioscience

Agilent | Trusted Answers

The banner features a photograph of three scientists in white lab coats reviewing documents and a tablet in a laboratory setting. The text on the left lists the participating universities and the event dates. The Agilent logo and tagline are at the bottom.

Join us for this three-day virtual symposium that brings together three of our Agilent Partner Universities – the University of Southern California, Imperial College London, and the National University of Singapore – for presentations and discussions around the theme of “Academic Drug Discovery”.

Register to meet with representatives from each of these leading research institutions from around the globe to discuss their research focus, recent work/projects, and opportunities for collaboration.

Each of the participating institutions is an Agilent Center of Excellence focused on projects that allow their world-class scientists to apply our new products and technologies to their work to accelerate their research.

This is an interactive event featuring live Q&As, a virtual Exhibit Hall, and opportunities to chat live with Agilent and fellow attendees.
