

Solve.Care Korea appoints Dr Uhn Lee as President

16 February 2022 | News

Dr Lee has more than 35 years of experience as a neurosurgeon

Solve.Care has announced the appointment of Dr Uhn Lee as the company's president in Korea. Dr Lee has more than 35 years of experience as a neurosurgeon. He currently practices at Gachon University, Gil Medical Center. Specialising in Artificial Intelligence (AI) and the future of healthcare, Dr Lee is also Director of AI Healthcare Platform Research Lab at Gachon University, as well as Chairman of the Metaverse Doctors Alliance. Before this appointment, Dr Lee served as an advisory board member to Solve.Care.

Apart from managing the operations and expansion of the Solve.Care presence in Korea, Dr Lee's main responsibilities will be to oversee the creation and launch of Care Networks for the Korean and Asian markets. Dr Lee will also build partnerships with government agencies and entities in the healthcare sector such as hospitals, pharmacies, insurance and device companies. In addition to this, Dr Lee will also be responsible for increasing the availability of the SOLVE token through Digital Asset Trading Platforms in Korea and the APAC region in anticipation of the expansion of the company's health network ecosystem and the token's increased adoption on the Solve.Care Platform.
