

Trescal launches single source calibration solution across Australia and New Zealand

05 April 2022 | News

Trescal provides precision calibration expertise in every industry, geography and instrument across the world

Trescal, the global leader in calibration services, has announced the launch of its single source instrumentation solutions throughout Australia and New Zealand. The company regroups five acquisitions: Australasian Calibrating Services, Celemetrix, iPAC Solutions, Mobile Test-n-Cal, and the calibration arm of Sudel Industries. Together, the companies represent 175 experts with laboratories located in Adelaide, Auckland, Brisbane, Melbourne, Perth and Sydney.

Trescal provides precision calibration expertise in every industry, geography and instrument across the world. From a single point of contact, Trescal meets any client need either locally or by sending it to another laboratory within the Trescal network to meet rapid turnaround time. In Australia and New Zealand, Trescal has particular expertise in electrical, force and field calibration as well as high voltage testing.

Chris Body, Director of Trescal Australia and New Zealand: "While our name changes, our tradition for providing high quality and high value calibration and support services remains the same. By regrouping all of our companies under the Trescal umbrella, we strengthen our capabilities and diversify our services to better meet the needs of our clients."
