ASIA PHARMA EXPO 2022 / ASIA LAB EXPO 2022 to unravel in Bangladesh

April 27, 2022 | News

The 13th international exhibition to kick start from May 19 to 21, 2022 to explore the global pharma manufacturing industry

The 13th Asia Pharma Expo 2022 / Asia Lab Expo 2022, an international exhibition platform for comprehensive pharma manufacturing technologies is all set to kick start from May 19 to 21, 2022 in Dhaka, Bangladesh. The event will be the massive international exhibition of Bangladesh and South Asia on COMPLETE Pharma Manufacturing.

Global pharma manufacturing technology companies will be exhibiting their products and services at the exhibition from across the world. The event is jointly organised by the Bangladesh Association of Pharmaceutical Industries (Bangladesh Aushad Shilpa Samity), GPE EXPO PVT. LTD., and Alliant Ltd.

The global event will facilitate one-to-one industry stalwarts meetings among pharma manufacturing trade professionals to exchange the technology, skills, experience, and thoughts around pharma manufacturing to trigger novel ideas on manufacturing.

Exhibition highlights include but are not limited to,

- Pharma & API Processing & Packaging Machineries
- Packaging Materials
- Analytical and Biotech Instruments, Labware & Reagents
- CleanRooms and Water Management Equipments & Services,
- API, Excipients, Pharma Chemicals
- Turnkey Project Consultants
- Pharmaceutical Products, and many more

The platform showcases exhibitors from major countries involved in pharma manufacturing plants, esp. India, Bangladesh, South Korea, Japan, Taiwan, China, Singapore, UK, USA, Poland, Netherlands, Denmark, Germany, Italy, United Arab Emirates, France, and more. The event is graced and led by Mr. Nazmul Hassan, MP, President, BANGLADESH

ASSOCIATION OF PHARMACEUTICAL INDUSTRIES, Managing Director, BEXIMCO PHARMA LTD. The highly resourceful exhibition is all set to deliver important aspects of global pharma manufacturing.

The previous series of the exhibition have witnessed technology presentations addressing the latest trends and current practices of pharma manufacturing technology by the exhibiting companies. The resourceful presentation from pharma manufacturing fraternities has dwelled on advanced technologies in pharma projects, the COVID-19 fight, conceptual design of manufacturing facilities, pharma packaging, anti-counterfeiting solutions, cleanroom concept designs, technologies & innovation in centrifugation. dry granulation, tableting, OSD, water system (WFI-PS unit, PW generation, water distribution system, effluent treatment plant), quality control revolutions, validation of efficient manufacturing process, and more.
