Eurofins DiscoverX expands APAC operations with new biotech office in China

July 4, 2022 | News

To provide end-to-end high-quality innovative products to accelerate drug discovery programmes in the China market

Eurofins DiscoverX Products LLC, a global industry leader in products for small and large molecule drug discovery and QC lot release, has announced the official opening of its new China biotechnology office in Shanghai.

The launch of Eurofins DiscoverX (Shanghai) Ltd. broadens its Asia-Pacific (APAC) operations directly into the China market. This expansion establishes an operational base positioned to effectively serve China's growing biopharmaceutical sector with high-quality innovative products that accelerate drug discovery programmes.

With this fully operational Shanghai office, Eurofins DiscoverX can more readily provide its product menu cell lines, assay reagents, enzymes, and bioassay kits to the China market.

The new operation will also provide an efficient supply chain, local technical support, and the convenience for clients to pay in the Chinese Yuan (RMB) currency.
