

Basecare Medical and Haier Biomedical to build cryopreservation solutions for assisted reproduction

15 July 2022 | News

Embryo laboratory, andrology laboratory, and cryogenic storage laboratory are essential components in assisted reproduction

Suzhou Basecare Medical Corporation has entered into a strategic collaboration framework agreement with Qingdao Haier Biomedical Co., Ltd. According to the agreement, Basecare Medical and Haier Biomedical will carry out collaborative R&D in cryogenic refrigeration of the assisted reproduction sector and jointly offer cryopreservation solutions for the assisted reproduction sector, which is another in-depth business collaboration following the capital collaboration between Basecare Medical and Haier Venture Capital FOF.

In this strategic collaboration, the two parties will integrate their respective resource advantages such as products and channels, and jointly build a cryopreservation solution in assisted reproduction sector from market promotion, technical support, collaborative R&D, to registration and certification, promoting the development of fertility preservation related application scenarios.

In addition, the new resource-sharing model will facilitate the development of the assisted reproductive industry, delivering good products and technologies to enter clinical applications quickly and effectively, so as to benefit more patients.
