

Sironax raises \$200 M in series B financing for pipeline expansion

03 August 2022 | News

Financing from new and existing investors will support pipeline progression and expansion for age-related degenerative diseases

China-based biotech startup Sironax, dedicated to the discovery and global development of novel treatments for patients with age-related degenerative diseases, has announced the completion of a \$200 million Series B financing.

The round was led by Gaorong Capital and Yunfeng Capital, with participation from existing investors including Temasek, Invus, F-Prime Capital, Eight Roads, ARCH Venture Partners, K2 Venture Partners and lead investors from previous financings. In addition to the co-leads, new investors include MSA Capital, CBC Group, Long River Investments, LSV Capital, Superstring Capital, and Future Innovation Fund as well as a wholly-owned subsidiary of the Abu Dhabi Investment Authority (ADIA). With the closing of this round, the company has raised over \$300 million to date.

Sironax's pipeline is comprised of multiple programmes with a focus on key mechanisms underlying age-related degenerative diseases including regulated cell death, neuroprotective pathways and neuroinflammation.

Sironax plans to use the proceeds to support the ongoing clinical development of its portfolio of receptor-interacting serine/threonine-protein kinase 1 (RIPK1) inhibitors in addition to the continued expansion of its R&D footprint and pipeline of potential best- and first-in-class candidates for age-related degenerative diseases.
