

## Portfolio Management and Pipeline Optimization for Generics (15th Edition) conference to unravel global generic pharma market opportunities

08 August 2022 | News

**Aims to facilitate partnerships and alliances among diversified global and domestic generic pharmaceutical markets and to capitalize on the investment**

Pharmaceutical companies need to ensure they have a competitive edge in the market while adapting to evolving industry best practices that advance product selection and portfolio management. From developing and selecting products that will optimize a portfolio, to engaging in potential partnerships with a CMO/CDMOs to improve engagement and increase ROI, these generic pharmaceutical companies need to implement actionable tools and strategies that can streamline these changes efficiently and quickly.

Addressing all the above, the premier **Portfolio Management and Pipeline Optimization for Generics, 15th Edition** conference will feature a variety of content-rich presentations on portfolio optimization, product selection, portfolio value, partnership and alliance management, and forecasting for future projects, and capitalizing on new opportunities to drive business growth. During the conference, the delegates and players in the generic pharma space will discuss on how to navigate the world space to acquire their major supplies in a timely manner to make profitable deals by building value-added alliances and partnerships. The forum will also help in understanding market competitiveness, challenges in entering new markets, technologies, and branded and complex formulations.

### **Benefits of attending:**
