Porton Advanced, Kun Tuo to deepen gene & cell therapy CDMO services in China

August 31, 2022 | News

To promote the construction of the gene and cell therapy industry ecosystem

China-based Porton Advanced Solutions and Kun Tuo Medical Research and Development (Beijing) have established a strategic partnership in gene and cell therapy R&D, manufacturing and clinical services to accelerate the development and industrialization of innovative drugs.

Through this strategic cooperation, Porton Advanced and Kun Tuo will fully leverage their strengths, client resources and professional team capabilities to deepen cooperation in gene and cell therapy R&D, manufacturing and clinical research, providing one-stop CDMO and clinical research services for innovative drug companies and cooperating to establish a high-quality gene and cell therapy industry ecosystem.

Focusing on gene and cell therapy, Porton Advanced has built CDMO platforms for plasmids, cell therapy, gene therapy, oncolytic virus, nucleic acid therapy and microbialvector based gene therapy.

As a clinical research organization (CRO) specially established by IQVIA for the Chinese market, Kun Tuo inherits its refined quality management system and standards, coupled with abundant clinical resources, offering high quality CRO services throughout IND to NDA. Since its establishment in 2011, Kun Tuo has provided over 1,000 clinical study services for multiple renowned pharmaceutical companies at home and abroad.
