Indian firm Excelra expands scientific products footprint in Japanese market

September 21, 2022 | News

To drive data enrichment, competitive intelligence, and power prediction engines with AI/ML initiatives

India-based Excelra has announced a partnership with Patcore, Inc., providing greater access to Excelra's scientific data and analytics products for customers in Japan.

Excelra is one of the leading global data and digital insights organization. Its GOSTAR platform is the largest manually curated medicinal chemistry intelligence database, providing comprehensive, structured SAR data for more than 9 million compounds. Excelra's GOBIOM contains the most extensive manually curated collection of validated and putative biomarkers, providing critical insights into the relationship between biomarker and disease.

Patcore is a highly specialized informatics organization, supporting researchers in life sciences companies and chemical industries. The partnership supports Excelra's growth in Japan, leveraging Patcore's experience working with some of Japan's largest pharmas, biotechs, chemical companies, and government institutions.
