

TVM Capital, Siemens Healthineers to advance healthcare access in Southeast Asia

12 October 2022 | News

To ensure patients' improved access to quality and affordable healthcare services and accelerate sustainable growth for healthcare providers across Southeast Asia

TVM Capital Healthcare, an emerging-markets focused healthcare private equity firm headquartered in Singapore and Dubai, with presence in Boston and Munich, and Siemens Healthineers, have announced a landmark cooperation to support and accelerate the growth of innovative healthcare companies in Southeast Asia (SEA).

Under the agreement, TVM Capital Healthcare's portfolio companies in SEA will be able to leverage Siemens Healthineers' expertise in the medical technology industry, and its strong global as well as significant regional presence in Southeast Asia.

Through its exclusive "Value Partnership" model, Siemens Healthineers enables healthcare providers to optimize business processes, expand capabilities and advance innovation. This partnership model goes beyond the entire Siemens Healthineers portfolio to generate added value above and beyond the medical technology itself.

Siemens Healthineers will also provide access to its Consulting Hub in Singapore to provide consulting on healthcare strategy, development of "Centers of Excellence" in key areas such as Oncology, Cardiology and Neurology, digitalization and operational improvement. This hub is a part of the global Siemens Healthineers consulting network with Consulting Hubs located in the United States, Europe, and Singapore.
