Chinese firm Tianlong introduces innovative PCR lab solution

February 13, 2023 | News

Tianlong Panall 8000 is a simple and secure molecular diagnosis system

China-based Tianlong launched its new product Panall 8000 All-in-one Molecular Diagnosis System, at Medlab Middle East 2023, a leading exhibition of laboratory medicine in Middle East region, at Dubai World Trade Center from 6 to 9 February.

The new lab booster, Tianlong Panall 8000, is a simple and secure molecular diagnosis system that integrates the functions of sample tube decapping/capping, sample loading, nucleic acid extraction, PCR setup, PCR detection, and result analysis, which can realise a true sample in -result out detection process and bring great convenience for professionals with only one-key operation.

Tianlong has developed innovative PCR lab solutions, covering nucleic acid extractors, real-time PCR systems, sample processing systems, liquid handling systems, and compatible reagents. The star products from Tianlong have got recognition from new and old partners for its excellent performance and stable quality.
