

Down Syndrome International (DSi) has officially designated March 21 (21/3) as World Down Syndrome Day (WDSD). This date was chosen to mark the uniqueness of Down Syndrome, caused by trisomy (3) of the 21st chromosome.

21 March 2023 | Analysis

**By embracing individuals with Down Syndrome and special abilities, we can create a more accepting and supportive society for everyone. So, let's together create a single voice advocating for the rights, #inclusion and well being of the people with Down syndrome in everyday activities with the aim of improving their position in society.
#WithUsNotForUs**
