Spanish player Canvax strengthens portfolio with Buffers & Liquids solutions

April 10, 2023 | News

Enabling a no-risk transition from pilot to full-scale production batches

Canvax, the leading Spanish manufacturer of Buffers, Enzymes, Kits and Reagents, has announced the introduction in its portfolio of a new category based on custom-made Buffers & Liquids Solutions, manufactured under GMP-grade and commercial scale. These products are specifically designed for companies that require high-quality solutions in different qualities, from RUO to GMP.

The cGMP Buffers & Liquids solutions are manufactured in its state-of-the-art facility at Valladolid (Spain) that meets the highest standards of quality and regulatory compliance: ISO 9001:2015, ISO 13485:2016 for the Research use Raw Materials and Ancillary Reagents, cGMP, current Good Manufacturing Practice according to ICH Q7 and in continuous improvement.

Canvax´s team has a wide experience across all stages of the biopharmaceutical value chain, from research up to clinical stage.

Its portfolio includes the most used buffers, liquid solutions, custom blends, chemicals and dilutions suitable to be used as raw materials for Vaccines, Cell or Protein based Therapies, Diagnostics, Veterinary and much more applications.

Additionally, Canvax can customise the formula or manufacturing grade, starting from Research grade to Clinical grade according to GMP on a commercial scale. It enables its worldwide customers to go from lab-scale to commercial-scale in a few weeks.
