Webinar Alert: Enhance research and delivery of complex medicine using data

February 7, 2024 | News

Learn how Life Sciences leaders bring new and differentiated therapeutics to market safely, effectively, and quickly using data management and innovation

Hear leaders at Resilience and AWS discuss how data and innovation are revolutionizing research and delivery of complex medicines.

This discussion will cover how to:

• Harness the power of data to accelerate insights and research
• Leverage data analytics for more informed research and delivery of complex medicines
• Improve speed of data ingestion, data transcription, and critical decision making
