

Thermo Fisher Scientific to open new office in Indonesia in April 2024

01 March 2024 | News

To nurture local talent and support scientific advancements within the community

Thermo Fisher Scientific will significantly expand local operations in Indonesia with the opening of its first official office. The inauguration of the new facility in Jakarta is scheduled for April, signifying a key milestone as the company transitions from its current representative office to a larger workspace.

Over the past year, Thermo Fisher has taken significant steps to strengthen its presence in Indonesia, including the establishment of a legal entity in the country. This strategic move aims to enhance customer proximity and deepen relationships with Indonesian stakeholders. The establishment of the new office in Jakarta is set to nurture local talent and support scientific advancements within the community.

To lead its growth and operations in Indonesia, Thermo Fisher has appointed Devi Darmadi as the country general manager. In this role, Darmadi will spearhead strategic initiatives and go-to-market evolution, geared toward expanding the company's footprint in Indonesia.

Thermo Fisher has previously also forged a strong partnership with National Research and Innovation Agency of Indonesia (BRIN, Badan Riset dan Inovasi Nasional) to strengthen research infrastructure and capabilities in the country. By leveraging its expertise and extensive portfolio, Thermo Fisher has become a key partner in supporting BRIN's goal of improving competencies and capacities for Indonesian researchers.
