

## Bayer stops haemophilia trial amidst drug safety concern

09 May 2013 | News | By BioSpectrum Bureau

**Singapore:** Bayer HealthCare has stopped its phase II/III study testing its experimental treatment BAY 86-6150 on certain haemophilia A and B patients due to safety concerns.

A spokesperson of the company revealed that, "The hope that BAY 86-6150 might help patients with inhibitors to achieve better control of their disease could not be fulfilled due to the detection of a neutralizing antibody in the trial."
