

Takeda Hospital Group allies with TriNetX Network to revolutionize medical care in Japan

19 March 2024 | News

Collaboration enables medical professionals to better envision clinical data to strengthen healthcare deliveries

Takeda Hospital Group, a leading healthcare provider in Kyoto, Japan Prefecture, has joined the TriNetX, LLC (TriNetX) network. Recognizing the need for tailored treatments based on the distinct genetic and lifestyle factors of Japanese patients, Takeda Hospital Group will leverage the TriNetX Network to support clinical research trials.

Jun Takeda, Director of Koseikai Takeda Hospital explains "With the constant introduction of new drugs, we expect to highlight the potential risks and benefits of various drug combinations across medical departments by using TriNetX's large-scale data for research such as age-specific analytical research."

Chairman of the Takeda Hospital Group, Takahisa Takeda, highlighted the significance of the partnership in navigating the complexity of modern medical care. He remarked, "In today's increasingly intricate medical landscape, collaborating with TriNetX will enable us to visualize clinical data, share knowledge among medical professionals, and benefit patients, healthcare providers, and society by reducing drug loss and lag, particularly for drugs already approved outside of Japan."

TriNetX is a global network of healthcare organizations and life sciences companies driving real-world research to accelerate the development of new therapies. Through its self-service, HIPAA, GDPR, and LGPD-compliant platform of federated EHR, datasets, and consulting partnerships, TriNetX puts the power of real-world data into the hands of its worldwide community to improve protocol design, streamline trial operations, refine safety signals, and enrich real-world evidence generation
