

Glen Pater is APAC head of UK-based CRO TranScrip

03 September 2013 | News | By BioSpectrum Bureau

Singapore: TranScrip Partners, a UK-based contract service organization, has appointed Australia-based Dr Glen Pater.

Dr Pater, who is a pharmaceutical physician, will be responsible for supporting several major Asia Pacific launches for big pharma.

"The appointment of a senior partner to the Australian office of TranScrip will offer a substantial gateway to Asia. This will allow us to better support our clients and their global programmes and add to the depth and breadth of our expertise in drug development and commercialisation", said TranScrip's managing partner, Dr Flic Gabbay.

TranScrip Partners supports biopharmaceutical product development and life-cycle management across a client base of over 80 companies.
